

**FIGURE 2: PROPOSED HYDRO-ELECTRIC DEVELOPMENT ON NAMAKAN RIVER**

Notes:

Myrtle Falls hydro station & associated development “may be developed within the next 5 years” (Draft ER, page 6.3).

Hay Rapids hydro station, diversion canal & transmission corridor were dropped from the current proposal for technical & financial reasons (EA newsletter, January 2009), but are recommended for reconsideration within the next 10 years (Draft ER, p. 1.20). Hay Rapids excavations are part of current proposal.
